

Your partner for

systems engineering,
maintenance and
facility management

TOTAL SOLUTIONS UNDER ONE ROOF

Axima Switzerland

Axima develops total solutions in the area of heating, ventilation, air conditioning, refrigeration, plumbing, MRPC (measurement, regulation and process control) and industrial media. It operates in the three business areas of systems engineering, maintenance and facility management. Axima Switzerland includes the firms of Axima Ltd, F. Heusser AG and Caliqua AG.

Integrated approach

Axima offers its clients a unique partnership concept: support for building automation systems and technical infrastructures throughout the entire life-cycle. This includes planning, realisation, maintenance, operation and renovation.

Service offering

Systems engineering

- consultancy and planning
- general technical contracting
- building technology
 - heating, ventilation, air-conditioning
 - refrigeration, plumbing, fire protection
 - clean room technology
 - building automation, MRPC
- energy technology

Maintenance and operation

- maintenance, inspection
- repair, trouble-shooting
- optimization of operation
- operation of installations

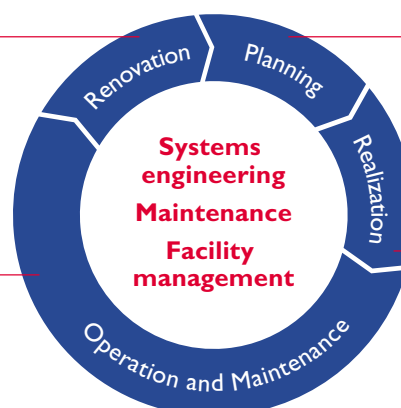

Facility management

- technical facility management
- management and operation of infrastructures for industrial and service processes

Efficient and sound
With sales of over CHF 300 million and over 1000 employees Axima Switzerland is the leading provider in the market.

BENEFITS FOR CLIENTS

Working with Axima brings many advantages:

Everything under one roof

Fewer interfaces, less labour, lower costs thanks to one single contact partner for systems engineering, maintenance and facility management.

Uniquely efficient

The size of the company and our local organisation make us the ideal partner for the realisation of customized operating models.

More than just experts

Our solutions take account of your company's core processes.

Concentration on the core business

You can leave the operational responsibility for support processes such as heating, ventilation, refrigeration, steam, electricity, water, compressed air etc. to us.

Increased economy

We achieve a higher level of system and infrastructure availability by optimizing processes and consequently reducing costs.

Extremely quick intervention times

From our locations, more than 30 in all, we are always nearby and quickly on-site.

Cost conscious

During the actual planning stage we look at ways of optimizing the operation of systems and building infrastructures.

Maximum safety

Adherence to the safety regulations and normative requirements at the workplace and the construction site is something we consider as a matter of course.

Innovative solutions

Our processes and systems are geared towards the current and future challenges faced by our clients.
